HOW TO OPERATE

Before first use, clean the inside of the unit by wiping with a moist, non-abrasive sponge, towel or cloth and then wipe with a non-abrasive dry towel. Wipe down the inside of the Kettle and be sure it is properly placed in the brackets before starting.

1. First, find a flat surface near an electrical outlet before starting. Make sure your cord is away from any water source. It is acceptable to use an extension cord if needed.
2. Gather your popcorn making supplies: popcorn, seasonings, bowls or bags for holding the popcorn, cooking oil, Kernel Measuring Cup (H1) and Oil Measuring Spoon (H2). (Kernel Measuring Cup and Oil Measuring Spoon are included with your unit.)
3. Plug in the appliance while switch is flipped to OFF position.
4. Make sure Kettle is properly secured in support brackets.
5. Make sure Kettle motor is fully plugged into the outlet located on the bottom side of the kettle. NOTE: Kettle will not heat if plug is not fully inserted.
6. Turn appliance ON by flipping the switch on the top of the machine (see illustration above for location of switches). Allow the appliance to run 3-5 minutes to heat up Kettle.
7. Turn unit OFF.
8. Use the Oil Measuring Spoon (H2) supplied with your OLD FASHIONED MOVIE TIME POPCORN CART with CONCESSION STAND to add 1 tablespoon of your favorite popcorn cooking oil to the Kettle. For best popping results, it is suggested to use vegetable oil.
9. Add popcorn kernels to the Kettle using supplied Kernel Measuring Cup (H1).
NOTE: If you are using pre-measured packages of corn kernels or popcorn making kits, you must still measure out the corn kernels and oil using the supplied Kernel Measuring Cup (H1) and Oil Measuring Spoon (H2). Always follow this rule: 1 Tbsp. oil + 2-oz. popcorn = 8 cups popcorn.
10. Turn the unit ON and close the door. In no time at all, you will hear the popping begin. Fresh, hot popcorn will begin to burst out of the flip lids on the Kettle - just like at the theater!
11. Use your Popcorn Scoop (J) to scoop and serve.

HELPFUL TIPS

NEVER leave the unit unattended while operating.

SMOKING

If your OLD FASHIONED MOVIE TIME POPCORN CART with CONCESSION STAND begins to smoke during cooking, it may be due to grease build up. In order to reduce smoking, make sure that you clean the inside of the Kettle between uses.

POPCORN

For best results, use an all natural soft-shelled popping corn. Organic popping corn is not recommended for use in your OLD FASHIONED MOVIE TIME POPCORN CART with CONCESSION STAND as it has a harder husk and will result in more unpopped kernels.

CLEANING & MAINTENANCE

1. Make sure appliance is unplugged and COMPLETELY COOLED before cleaning. Unplug the outer plug to the outlet as well as the Kettle motor plug inside the Main Unit (A).
2. Use slightly damp, non-abrasive sponge, towel or cloth to wipe down the inside and outside of Main Unit (A), then wipe with a non-abrasive towel to dry.
3. Unplug Kettle motor and remove Kettle from support brackets.
4. Take Kettle out of the Main Unit (A). After removing Kettle from Main Unit (A), fill $\frac{2}{3}$ of Kettle with hot, soapy water.
5. Let the Kettle sit for 15 – 20 minutes to cut the grease. (Time may vary – use your own judgment depending on the amount of cleaning necessary.)
6. Empty water. If necessary, use the scrubber side of a cleaning sponge to scrub inside of Kettle.
7. Rinse inside carefully and dry.
8. Wipe outside of Kettle with damp cloth and dry.

NOTE: To protect the motor plug from getting wet, **never immerse the Kettle in any liquid.** Never place any parts in the dishwasher. Always wash by hand.
